CCTV VESSEL INSPECTION SYSTEM

Robust PoE CCTV System for Vessel Inspection and Monitoring

The Luno Systems CCTV vessel inspection PoE (Power over Ethernet) system features a robust, case-mounted package designed for monitoring vessels.

As standard, the system is supplied with a single camera stream but can support up to four cameras if required, providing full video recording capability. CCTV camera or an explosion-proof version is available for use in hazardous areas.

The NVR recorder system is housed in a waterproof, shock-absorbent case, allowing for rapid deployment on site. A choice of a standard CCTV camera or an explosion-proof version is available for use in hazardous areas.

The system can also be installed as a permanent fixture in a life support control room, complete with a monitor screen of the desired size.

FEATURES

NVR/CASE

- Screen 17 inch
- 8MP (4K) PoE IP NVR
- Motion detection
- Mains Powered 240v AC

CCTV NVR & Monitor Case

EXPLOSION PROOF CCTV CAMERA

- ATEX Zone 1&2 / 21&22, II 2D Ex tb IIIC IP68 T80°C Db
- 4MP
- IR distance: 15m
- Lens: 4/6mm
- Explosion-proof, anti-corrosion, waterproof
- Adopt SONY 1/3" CMOS Sensor, resolution up to 1920×1080 pixel
- Low power consumption, heat dissipative design
- 304 stainless steel carcass
- IP68
- 360 degree rotation
- Scaffold clamp

CCTV Camera with scaffold clamp

STANDARD CCTV CAMERA

- 4MP
- 2.8mm (90°) Lens
- Weatherproof IP67 rating
- 30 metre night vision
- Alarm inputs & outputs
- 360 degree rotation
- Scaffold clamp

CCTV 100m cable/cable reel

TYPICAL CONFIGURATION OPTIONS

CCTV RECORDER	
20705	CCTV NVR AND MONITOR CASE

CCTV CAMERA	
20702	EX CCTV CAMERA WITH SCAFFOLD CLAMP IN CASE
20704	STANDARD CCTV CAMERA WITH SCAFFOLD CLAMP IN CASE

CCTV CABLE	
20706	EX CCTV CABLE 100M ON STAINLESS STEEL CABLE REEL
20703	STANDARD CCTV CABLE 100M ON STAINLESS STEEL CABLE REEL
